Community support and research

For Freemasons, for families, for everyone
www.mcf.org.uk

Masonic
Charitable Foundation

The Masonic Charitable Foundation is a charity funded entirely through the generosity of Freemasons. We build better lives by enabling opportunity, advancing healthcare and education and promoting independence for Freemasons, their wives, partners, children and grandchildren who have a financial, health or family need.

We also look beyond Freemasonry, making significant financial grants which help people to live happy, fulfilling lives and participate actively in society.

Through the Masonic Charitable Foundation and its predecessor charities, Freemasons have provided support amounting to around £130 million to charities across England and Wales and overseas in recent years.

The grants made to these charities seek to benefit as many people as possible and further those causes about which Freemasons and their families have told us they are most passionate. The charities we support make a significant and lasting difference to thousands of people in need.

For Freemasons, for families, for everyone

Community support and research grants awarded in 2015

 **£4,771,437**

For a detailed list of grants, turn to the centre pages of this brochure.

We award grants to charities that provide support in these areas:

Financial hardship

We award grants to charities that relieve household or individual financial poverty. The charities we support help people to recover from financial hardship or avoid getting into financial difficulty altogether.

Our grants can support services such as:

- ♥ Debt counselling and advice
- ♥ Financial education workshops for adults and young people
- ♥ Financial assistance for homeless people, care-leavers or those affected by cancer, long-term illness or disability

We awarded £30,000 to The Haven to fund a Welfare Benefits and Money Advice Service which was introduced as a joint venture with Macmillan Cancer Support to help ensure that cancer patients do not struggle financially while undergoing treatment. The Haven is a national charity providing personalised care and support for people with breast cancer, helping them to achieve the best possible quality of life.

“ We are so very grateful for this generous grant which has provided a financial lifeline to so many people affected by breast cancer. Having a cancer diagnosis is bad enough without having the additional worries about the financial impact it can have. ”

Hannah Daws, Fundraising & Communications Director at The Haven

Health & disability

Our grants support charities that improve the lives of people with poor physical and mental health, physical or learning disabilities and chronic or life-limiting conditions. Other charities we support help carers and those in need of end-of-life or palliative care.

Our grants can support services such as:

- ♥ The development and provision of equipment to assist those with a disability
- ♥ Access to specialist advice, support or therapies
- ♥ Supporting care needs, including respite care

We awarded £500,000 to the Cystic Fibrosis Trust to develop their innovative SmartCareCF programme which has been largely funded by a Masonic Charitable Foundation grant. SmartCareCF will explore the benefits of monitoring the condition at home and liaising with specialist health teams remotely rather than having to repeatedly travel into hospital. This could reduce the risk of hospital-based infections and lessen the daily burden of living with the condition.

“ We are very grateful to the Masonic Charitable Foundation for the opportunity to expand our work in healthcare technology. ”

Ed Owen, Chief Executive at The Cystic Fibrosis Trust

Education & employment for young people

We support disadvantaged children and young people up to the age of 25 by awarding grants to charities that remove barriers to education and employment.

The charities provide opportunities for children and young people who are not in education, employment or training, those who are affected by poor health and disability and those who are at risk of further disadvantage. The charities help young people to develop new social skills, gain work experience and overcome barriers to education, employment or qualifications.

Our grants can support services such as:

- ♥ **Apprenticeships, bursaries and training**
- ♥ **The use of sport or alternative approaches to enable learning and development**
- ♥ **Learning opportunities for disabled children and young people**

DAME KELLY HOLMES TRUST

We awarded £16,000 to the Dame Kelly Holmes Trust to fund 'Get on Track', the charity's flagship 14-month programme that supports young people currently out of education, training and employment.

The programme is led by world-class athletes and uses sport to build confidence, teamwork and communication skills while working alongside local corporate volunteers to teach employability skills, CV writing and job interview techniques. The

young people involved participate in work experience related to their career aspirations and can achieve qualifications in subjects such as First Aid, Food Hygiene and Sports Leadership.

Double Olympic champion Dame Kelly Holmes founded the charity in 2008 with the mission of retraining world class athletes as mentors to engage, enable and empower disadvantaged young people to help them progress to a more positive future.

“ We are extremely grateful to the Masonic Charitable Foundation for helping us launch our first ever Get on Track programme in Wales. This will allow our team of world class athletes to equip young people facing disadvantage in Bridgend with the attitudes and capabilities to make positive life choices. ”

Emma Atkins, Chief Executive at Dame Kelly Holmes Trust

Social exclusion & disadvantage

We relieve isolation and loneliness in the community by supporting charities working with those who have experienced family breakdown or crisis, rural or urban deprivation, homelessness, digital exclusion or difficulty reintegrating into society. Some of the charities we support help those for whom disability or long-term illness acts as a barrier to a fulfilling life, including those who are carers for family members, while others enable people over the age of 25 to access employability training.

Our grants can support services such as:

- ♥ Befriending schemes to reach disabled or older people living alone
- ♥ Parenting support for disadvantaged families with young children
- ♥ Adult education and training programmes for those trying to reintegrate into society

We awarded £40,000 to Emmaus UK to help expand their vital work to overcome homelessness and social exclusion.

For many people who have experienced homelessness, losing their self-esteem can be the most damaging part of the experience. Emmaus UK gives people the opportunity to reflect on their lives, deal with any issues they may have, re-establish relationships and reintegrate into society.

“ The funding that we have received from the Masonic Charitable Foundation is being used to strengthen the support services we offer to local Emmaus communities. We’re very grateful to have received this generous grant and look forward to using it to help more and more people rebuild their lives. ”

Simon Grainge, Chief Executive at Emmaus UK

Medical & social research

We fund medical and social research into a wide range of disabilities, diseases and conditions. This is a cause that Freemasons and their families have told us they care about greatly and in 2015 alone we awarded £1.5 million thanks to their generosity.

Research funded includes:

- ♥ Age-related degenerative disease such as Alzheimer’s, Parkinson’s, motor neurone disease, dementia, macular degeneration and hearing loss
- ♥ Childhood diseases such as cystic fibrosis and neonatal conditions
- ♥ Chronic illnesses including cancer and heart disease
- ♥ Research into arthritis and musculoskeletal conditions, and the use of artificial limbs and aids.
- ♥ Social research where there is a clear focus on positive social outcomes, for example mental health social research

We awarded £100,000 to Alzheimer’s Research UK to support the development of a blood test to diagnose Alzheimer’s disease in its earliest stages.

“ This incredibly generous gift has the power to improve clinical trials for Alzheimer’s disease. A simple blood test to help predict whether people with mild memory problems will go on to develop Alzheimer’s has huge potential to ensure people receive the right drugs at the right time. ”

Hilary Evans, Chief Executive at Alzheimer’s Research UK

Hospices

Each year, grants are made to support the operating costs of adult and children's hospices that receive 60% or less of their funding from the NHS.

In 2015, £600,000 was awarded to 245 hospices across England and Wales.

! Disaster relief appeals

Funding is also provided to support major natural disaster relief appeals at the discretion of the President.

Since 1981, Freemasons have given over £2.5 million to help the victims of floods, earthquakes, famines and other terrible events in the UK and worldwide.

“The Freemasons have always been among the first to generously support us when the Red Cross responds to a disaster. They’ve given over £2million over the past thirty years to the Red Cross and we’re proud to have them as such important partners.”

Mark Astarita, Executive Director of Fundraising, British Red Cross

Air ambulance & rescue services

We have regularly supported air ambulance and rescue services, donating £1.7 million in total since 2007.

Every air ambulance or equivalent service charity in England and Wales has received funding. In 2015, 22 rescue services received grants totalling £192,000.

Grants awarded 2015

 **Total £4,771,737**

Large grants

 **£2,254,237**

- ♥ **AbilityNet**
